## ▶ Feature:

1. Paperless conference system rack server, data storage management center of paperless conference system software;

2. Adopt Xeon series processors dedicated to enterprise-level servers to maintain long-term stable operation of the server and keep the business online

3. Adopt enterprise-level hard disks, which greatly improve data security and reduce hard disk failure rate compared with desktop-level hard disks

4. Adopt industrial-grade industrial computer standard rack chassis design, 2U height, Magang high-grade flowerless galvanized plate design structure, with extremely high anti-magnetic, dust-proof and impact-proof capabilities

5. With professional server system, it can achieve strong reliability and ensure the perfect operation of paperless system

6. Rich external interfaces reflect the scalability of the equipment and facilitate expansion and access to other devices

7. Built-in dual Gigabit network cards to realize simultaneous operation of internal and external networks

8. The front panel is equipped with power on and restart buttons, status indicator lights, which can intuitively check whether the equipment is running normally, and conveniently restart the equipment quickly

9. Supports simultaneous dual display, one standard HDMI and one VGA signal output, supports adaptive resolution adjustment, and is convenient for displaying multiple adaptive images

## ▶ Specification:

| | |
|---|---|
| CPU | Xeon series processor |
| Memory | 32GB |
| Hard disk | 1T SSD |
| BIOS | AMI EFI BIOS |
| Super l/O | Fintek F81866AD |
| Ethernet | 2x Intel I210 10/100/1000Mbps LAN |
| Graphics control | Intel Skylake/Kaby Lake-S embedded GPU |
| Display | 1x VGA, 1x HDMI (VGA, HDMI rear IO panel) |
| VGA supports a maximum resolution | 1920 x 1200@60Hz |
| HDMI supports a maximum resolution | 4096 x 2160@60Hz |
| SATA | 6x SATA3.0 (Built-in motherboard interface, not visible outside the chassis) |
| USB interface | 6xUSB3.0, 6xUSB2.0 (2 on the front panel, 4 on the rear panel) |
| Serial port | 6x RS232 (pin), COM1 supports RS422, RS485 mode |
| PS/2 | 1x PS/2 keyboard and mouse pin |
| Audio | Realtek ALC662 HD Audio |
| Watchdog | 255-level timer, resettable |
| Power supply type | 24+4Pin ATX power supply |
| Environmental requirements | Operating temperature: -10C ~ 60C |
| Storage temperature | -40°C ~ 85C |
| Humidity | 5% ~ 95% relative humidity, no condensation |
| Product size | 480*430*89mm (length x width x height) |
