

► Feature:

1. The ink screen electronic conference table sign is an intelligent paperless conference device that transmits display information to the terminal through wireless technology, combined with mobile phones and cloud management systems. It is suitable for conference rooms such as high-end hotels, government agencies, large enterprises and companies.
2. Low-carbon and environmentally friendly, simple to operate, replaces traditional paper table signs, reduces paper printing, and arranges the venue in advance. The venue is full of high-end atmosphere, increases the sense of technology and atmosphere of the venue, and is the best choice for the information upgrade of major conference venues.
3. Compared with traditional electronic table signs, it has the characteristics of no reflection when taking pictures, no glare when watching for a long time, no black screen when power off, and strong battery life.
4. The screen adopts E-Ink ink screen technology, which is easy to read, flicker-free, radiation-free, and does not hurt the eyes when watching for a long time. The reading angle can be close to 180°, and full-angle reading can bring a better reading experience.
5. Energy saving and power saving, the display is static, power failure does not affect the display content, no refresh and no power consumption, extremely low power consumption, using two No. 5 dry battery, fully charged for more than 24 months (based on laboratory data: refresh the screen once a day).
6. Support the screen to remain unchanged when the battery is out of power.
7. Adopt advanced Bluetooth + NFC technology, wireless control, one-click refresh, fast and efficient, flashing not only relies on NFC, but also supports any Android and Hongmeng system mobile phones with Bluetooth to modify the table card display information.
8. Both sides can display different information and names, the background can be customized, built-in multiple background skins, support custom image import, and the software supports intelligent conversion of image display.
9. Support computer cloud server, management of personnel information, grouping, template background, etc. (need to be equipped with a dedicated base station).

Specification:

Screen size	7.5 inches double-sided
Visual area	161.0 mm ×96.0mm
Resolution	800*480
DPI	125
Grayscale	black, white, red, yellow, orange, green, blue 2 grayscales
Product size	141.8×171×70 mm
Product weight	258±5g
Display type	bistable electronic ink screen
Orientation	horizontal screen
Viewing angle	nearly 180 degrees
Working temperature	15°C ~ 35°C
Storage temperature	-25°C ~ 60°C
Power supply	2 No. 5 alkaline dry batteries
Working voltage	2.5V ~ 3.6V
Working current	50mA for screen refresh, 0.2mA for standby current
Battery life	24 months of use with full charge (based on laboratory data)
Bluetooth version	compatible with BLE 5.0
NFC	ISO/IEC14443-A
Working mode 1	through NFC in the center of the display Transmit images.
Working mode 2	Transmit images via mobile phone Bluetooth. Transmission radius is more than 15 meters (unobstructed).
Working mode 3	Computer control, transmit images via Bluetooth base station, transmission radius is more than 15 meters (unobstructed).
Mobile phone operating system	Android (Android 7.0 and above), Apple (9.0 and above), Hongmeng
Server system	Windows 7, Linux
Cloud server	Support
Offline mobile phone version	Support Android phones
System docking	Support docking with third-party systems
