

► Product Features

1. 2.8-inch color display screen, which can display signal, battery power, group, ID address number, speech timer and other contents
2. The unit panel adopts high-strength alloy metal panel, the microphone tube adopts a short square tube with a length of 230mm, and the tail adopts a delicate metal sign, which has a stronger sense of luxury and exquisite appearance
3. When the unit is in communication status, the blue light on the side of the pole is long, which is high-end and atmospheric
4. High-definition vocal restoration, super-cardioid directivity, and unique endurance power supply technology

► Specifications

Carrier frequency band	UHF640MHz-690MHz	Frequency stability	±0.005%
Harmonic radiation	-65dBm	Maximum deviation	±45KHz
Bandwidth	50MHz	Channel spacing	125KHz
Spurious suppression	-60dB	Harmonic suppression	55dBc
Oscillation mode	PLL phase-locked frequency synthesis		
Battery used	3 AA batteries (compatible with AA rechargeable batteries)		
base width	110*depth 140*height 60mm (excluding shaft)		
Microphone core	14mm capacitor microphone core, supercardioid directivity		
Dimensions	Microphone rod length 230*width 37*height 26mm;
