

▶ Product Features

1. 2.8-inch color display screen, which can display signal, battery power, group, ID address number, speech timer and other contents
2. The unit panel adopts high-strength alloy metal panel, with exquisite appearance
3. High-definition vocal restoration, super-cardioid directivity, and unique endurance power supply technology
4. The chairman unit has priority control function

▶ Specifications

Technical parameters			
Carrier frequency band	UHF640MHz-690MHz	Oscillation mode	PLL phase-locked frequency synthesis
Harmonic radiation	-65dBm	Maximum deviation	±45KHz
Bandwidth	50MHz	Channel spacing	125KHz
Spurious suppression	-60dB	Harmonic suppression	55dBc
Frequency stability	±0.005%	Microphone core	14mm capacitor microphone core, supercardioid directivity
Battery used	3 AA batteries (compatible with AA rechargeable batteries)		
Base size	width 110*depth 140*height 60mm		
Microphone rod size	360mm long, microphone head diameter 26mm
