

► Feature:

1. Waistpack wireless transmitter, can be paired with a clip microphone or a headset microphone
2. High contrast display: can display frequency, frequency number, group number, battery power, transmission signal strength, mute status and other information
3. Standard mini XLR interface, strong compatibility, can be connected to different microphones
4. Equipped with 4 setting buttons, equipped with an easy-to-use navigation menu, easy to set up and use
5. Transmitter parameters can be modified: support modification of frequency, transmission power, volume, etc. on the microphone
6. Support multi-color LED indicator: can display 8 different color labels to identify paired channels

► Specification:

Audio interface	Mini-XLR
Frequency range	660.05-685.05MHz
Dynamic range	101dB
Frequency response	60-18KHz
Frequency stability	±0.005%
Working distance	130m (open and interference-free)
Battery specifications	2×1.5V AA
Output power	high/medium/low three gears can be switched
Weight	75g (excluding battery and microphone)
Shell material	ABS
Dimensions	66*23*88 mm (length*width*height, excluding antenna)
Battery life	high power about 7 hours; Medium power about 8 hours; Low power about 10 hours
