

► Feature:

1. FT-4OIPUS is an IP encoding board that supports RTSP and ONVIF protocols
2. Used with a matrix, supports H.264/265 signal encoding
3. Can encode 4 1080p signals at the same time, and can select the encoding channel through the matrix
4. Supports RTSP and ONVIF protocols
5. The code stream is compiled as a standard code stream
