

Feature:

1. Comply with international standards IEC 61603-7 and IEC 60914
2. Comply with the latest national standard GB 50524-2010
3. Compatible with other infrared simultaneous interpretation systems that comply with IEC 61603-7 and can be used cross-over
4. Adopts DQPSK technology with independent intellectual property rights and related technologies with invention patents
5. Super strong transmission capability, up to 30 meters (25W)
6. Multiple channels use the same transmission unit
7. Hand-in-hand signal radiation enhanced coverage mode, which can easily expand the signal coverage range and can also be used to configure into multi-room mode
8. With cable transmission delay compensation function to ensure correct signal superposition transmission
9. Can be fixedly installed (configured with a universal bracket) or installed with a tripod bracket
10. Half-value transmission angle: ± 22 degrees

Specification:

HF input	rated 1 Vpp, minimum 10 mVpp
Half-intensity angle	$\pm 22^\circ$
Total peak light intensity	24 W/sr
Standby power consumption	25W
Power consumption	30W
Radiation distance	<30M/16CH
Power supply	AC110V-220V~ 50Hz-60Hz
Operating temperature	0°C-40°C
Dimensions	445×235×113mm
Weight	4.2kg
