

Feature:

1. High-grade aluminum 2U black oxidized brushed panel, beautiful and elegant
2. The first choice for power management of public broadcasting system
3. Turn on/off 16 controlled equipment power supplies in sequence
4. The total output capacity of the machine is up to 2.5KW
5. With short circuit and AC220V control switch function
6. The rear output socket can be completely powered off after shutdown
7. The power input cable of this machine is directly connected to the automatic air switch of industrial electrical appliances
8. Cooperate with the system timer to turn on/off 16 power supplies at a fixed time

Specification:

Control signal	AC220V, 10Ma, low-level short-circuit signal
Action time interval	0.4S ~ 0.5S
Channel switching capacity	2 kW (VA)
Controllable power output	sixteen channels (CH1 ~ CH6)
Power cord	(3×1.5 mm ²)×1.5M (standard)
Power supply	AC 220V ± 10% 50-60Hz
Power consumption	25~30W
Machine size	89(H)×483(W)×350(D)mm
Net weight	7.08kg
Socket output capacity	total capacity 4.5KW, each socket can be allocated to bear an average load capacity of 282W
