

Feature:

1. Fiberglass box, durable appearance
2. All-weather rainproof design, suitable for indoor and outdoor work
3. The high and low frequency axial components are precisely positioned in the axial horn, giving full play to the characteristics of the point sound source
4. Equipped with brackets and multi-point screw holes for reasonable and convenient installation
5. High-performance neodymium magnetic unit and precise frequency division, highlighting lightness, clarity and transparency

Specification:

Power	400W
Constant voltage input	70V-100V
Frequency response	70Hz-20KHz
Maximum sound pressure level	125dB
Appearance size	590*590*790mm
Installation form	directional bracket type
Decorative materials	fiberglass + iron mesh
Weight	37kg
Speaker size	15*1
