▶ Feature:

1.Supports 16 audio sources on one host to play automatically at the same time

2.Supports automatic playback (playing at a fixed time according to the program list) and manual playback. Automatic playback supports automatic playback modes such as day, week, and date library. Manual playback can play in sequence, loop, and follow-up

3.The new playback engine does not occupy CPU resources, the loading speed is very fast, and the playback of the whole area is completely synchronized. It supports common audio and video formats (MP3, WAV, WMA, WMV, RM, RMVB, MPEG1, MPEG2, DIVX, etc.) and can expand unknown formats

4.The playback engine supports audio fade-in and fade-out effects

5.The machine prompts 30 seconds in advance to avoid accidental shutdown

6.Number of channels: 16

7.Functions: scheduled playback, insert, support Dante virtual sound card
