4. Baud rate can be changed
5. Programmable, control interface is completely customizable
6. Support multiple formats of pictures (JPG, PNG, etc.)
7. Support multiple controls
8. Support swipe page turning, button page turning
9. SD card writing
10. Editable interface
11. Support independent or in conjunction with central control
12. Standard 87 box installation

Specification:

Resolution	1024*600
CPU	ARM Cortex™-A7
Dual core	1.2GHz
Screen	IPS Capacitive touch
Operating system	No operating system, it can run after power on
Storage space	16M
Communication method	RS-232, RS-485 optional
Firmware and program	insert SD card for local upgrade
Power supply	DC12V1A
Device size	173.8mm *111.2mm*43mm
Device weight	0.5KG
