

► Feature:

1. An extended line array box composed of 4 5.5-inch woofers for FT-L455 bass extension.
2. Streamlined design, with aluminum alloy bosses added to the upper and lower panels, and combined with the grille to better reflect the integrity, beautiful and practical appearance.
3. Special polyurea hard paint coating, no fear of bumps, no paint peeling.
4. Extend the frequency coverage of FT-L455 to 45Hz-400Hz, double the bass power, and increase the low-frequency sound pressure level.
5. It has three wall-mounted designs, and can use special mounting brackets to adjust the angle up, down, left and right, and can also be installed in combination with FT-L455, or can be installed close to the wall.

► Specification:

Unit specifications	4x5.5 ferrite
Impedance	8Ω
Rated power	350W (1400W, PEAK)
SPL (1W/1m)	99dB
Maximum SPL (1W/1m)	124dB (131dB, PEAK)
Frequency response	45Hz-400Hz, -10dB
Shell material	plywood + polyurea reinforced hard paint
Grille material	iron
Mounting holes	8 M8 + 4 M4
Installation system	You can use a special mounting bracket to adjust the angle up, down, left, and right, and you can also combine it with FT-L455 for installation, or you can install it close to the wall
Color	black
Dimensions (height × width × depth)	712x176x239mm
Product net weight	11.5kg
Packaging weight	13.3kg
