

### Feature:

1. Input and output voltage Optional voltage: 110V input = 110V output, 380V input = 220V output.
2. Output power socket provides 8+1 10A socket output (optional 8+2 10A socket output).
3. Socket material Each socket is made of phosphor copper, and all are strictly tested before installation, in line with national standards.
4. Each switch interval time is 1 second, each channel has a switch indicator, and can be set to delay 5 minutes through software.
5. Remote control function can be equipped with optional remote control with a distance range of 10 meters (15 meters without obstructions)
6. Online support for unlimited cascading.

### Specification:

Maximum input current	50A
Single-channel maximum output current	10A/13A
Working voltage	220V/50-60Hz
Each channel power	Max 3000W
Relay	16A Omron relay
Chassis height	1U
Switch	Boat switch
Weight	4Kg
Single-channel controlled function	Controllable through computer POWER test software
Circuit board circuit	uses 60% high-purity tin, high-end shunt technology, and is strengthened and thickened
