Embedded 7-inch control panel

T2-PLA107

▶ Product Features

1. RS-232/RS-485, TCP/IP communication mode
2. Support TF expansion, built-in buzzer, Linux system
3. Baud rate can be changed
4. Programmable, control interface is completely customized
5. Support multiple formats of pictures (JPG, PNG, etc.）
6. Support multiple controls
7. Support swipe page turning, button page turning
8. SD card writing
9. Editable interface
10. Support independent or coordinated use with central control
11. Standard 87 box installation

▶ Specifications

Resolution	1024*600	CPU	ARM Cortex™-A7
Dual core	1.2GHz	Screen	IPS Capacitive touch
Communication method	RS-232, RS-485 optional	Storage space	16M
Power supply	DC12V1A	Firmware and program	insert SD card for local upgrade
Device weight	0.4KG	Device size	173.8mm*111.2mm*43mm
Operating system	No operating system, it can run after power on
