

► Feature:

1. Handheld wireless microphone, professional design style, pure copper cavity design with sturdy and durable metal shell
2. Innovative anti-vibration suspension microphone connection structure, effectively reducing the noise caused by hand holding being picked up by the microphone
3. Replaceable microphone design: standard dynamic microphone, optional condenser microphone, can be connected to international brand sound head
4. Use high-resolution full-color LCD Display screen
5. Equipped with 4 setting buttons and easy-to-use navigation menu for easy setting and use
6. Supports one-button mute function for microphones, and hidden switch buttons to prevent misoperation
7. The microphone supports automatic mute when the battery compartment is opened, and unmute when the battery compartment is closed
8. Supports dynamic detection of the microphone: built-in sensor, automatically mutes when the microphone falls
9. Microphone parameters can be modified: support modification of frequency, transmission power, color labels, etc. on the microphone
10. Supports LED light strips and bottom indicator lights: 8 different color labels can be displayed to identify paired channels
11. Supports digital light guides: custom ID display with color label display to improve the recognition of the microphone
12. Equipped with charging contacts, the lithium battery version can be equipped with a charging base for charging without removing the microphone
13. Supports detachable sign hanging structure for easy hanging of LOGO and signs: LOGO and sign inside The capacity can be customized, and personalized display can be performed while preventing the microphone from falling due to rolling when placed
14. Supports Bluetooth non-contact firmware upgrade, which is convenient for upgrading and maintaining the device

► Specification:

Microphone 1	
Sensor type	dynamic coil,
Dynamic range	103dB
Frequency response	20-20KHz
Microphone 2	
Sensor type	capacitive,
Dynamic range	105dB
Frequency response	20-20KHz
Wireless transmission	
Frequency range	610.05-695.35MHz
Frequency stability	±0.005%
Working distance	200m (open and interference-free)
Number of custom colors	8 (green, red, blue, orange, blue-green, light purple, dark purple, none)
Battery specifications	2×1.5V AA (optional rechargeable lithium battery)
Output power	high/medium/low three levels switchable
Antenna type	integrated spiral
Color	pearl white (tungsten black, titanium gray optional)
Weight	430g without battery
Shell material	aluminum alloy
Size	diameter 53.5x218MM
Battery life	high power about 7 hours; medium power about 8 hours; low power about 10 hours
Charging	standard charging base
