

Specification:

- · Video Input Interfaces: Supports 5 types of video inputs, including:
 - 1× SDI
 - 1× HDMI
 - 1× DVI
 - 1× VGA
 - 1× CVBS
- · Input Resolution: Up to 1920×1200@60Hz, supports custom resolution settings.
- · Video Output Capacity:
 - Supports up to 2.6 million pixels.
 - Maximum width: 4096 pixels.
 - Maximum height: 2560 pixels.
- · Flexible Video Source Switching: Supports seamless video source switching and image scaling.
- · Dual USB 2.0 High-Speed Communication Ports: Used for PC debugging and cascading multiple units.
- · Seamless Multi-Transmitter Splicing: Supports arbitrary splicing and ensures strict synchronization.
- · Brightness & Color Temperature Adjustment: Fully adjustable to meet display requirements.
- · Low-Brightness, High-Grayscale Support: Enhances image quality under low brightness conditions.
- · **HDCP 1.4 Support**: Ensures encrypted content playback.
- · Broad Compatibility: Supports all series of receiving cards, multifunction cards, and fiber optic transceivers.
