

Feature:

1. Support 8-bit color depth video source input and output
2. Support 8-way HUB75 interface, directly connected to LED module
3. Support up to 16 sets of parallel RGB full-color data or 32 sets of serial RGB data
4. Support the maximum load of 192x1024 of mainstream chips in the market
5. Support arbitrary point extraction, arbitrary row extraction and column extraction
6. Support fast calibration and sequence of cabinets (new firmware)
7. Support any scanning type from static to 128 scans
8. Support data discount: 20% to 80% horizontally, 20% to 40% vertically
9. Support high-precision Integrated point-by-point correction of chromaticity and brightness
10. Support data group screen offset, suitable for simple special-shaped screens
11. Support screen rotation of 90/180/270° (with some main controls)
12. Support arbitrary routing within a single group of data with a maximum of 13312 pixels
13. Support adaptive frame rate technology, and can output 120Hz screen
14. Support low brightness and high gray, color temperature adjustment
15. Support special-shaped structure (special firmware)
16. Support loop backup and dual-machine backup (with main control)
17. Support power supply anti-reverse connection design
18. Support DC 3.8V~5.5V ultra-wide working voltage
19. Support a full range of conventional sending equipment
