

Feature:

- Handheld wireless microphone with a professional design style, featuring a durable metal body.
- Comes with a dedicated charging dock that can charge two microphones simultaneously.
- Equipped with an automatic frequency scanning function to find clean, interference-free frequencies with one click.
- Built-in anti-impact circuit to eliminate noise and impact sounds when powering on/off.
- Operates in the UHF 630~689MHz frequency band:

Channel A: 630.1~659.8MHz (100 frequency points)

Channel B: 660.1~689.8MHz (100 frequency points)

Strong anti-interference capability.

- LCD digital display on the handheld microphone for intuitive frequency and status display.
- The transmitter and receiver feature power and voltage detection functions for real-time synchronization.

Specification:

Parameter	Specification
Frequency Range	630~689.8MHz
Number of Channels	200 (100 frequency points per channel)
Modulation Mode	FM
Frequency Stability	±10ppm
Distortion	≤0.5%
RF Power Output	10dBm
Frequency Response	30~18,000Hz
Battery Type	14650 lithium battery (1200mAh, 3.7V)
Battery Life	Approx. 9 hours
Transmission Distance	100 meters (ideal conditions, open space, no interference)
